Total Experience: 8+ Years (May 2018 - Present)

SUMMARY

8+ years of professional software development experience across enterprise full-stack roles. Dynamic Full Stack Developer specializing in React and Java, with extensive experience in designing and maintaining web applications. Proven track record in enhancing system efficiency and user experience through adept problem-solving and project management skills. Proficient in front-end and back-end languages including Java, JavaScript, HTML/CSS, SQL databases, and RESTful APIs. Committed to leveraging technical expertise to drive innovative solutions and optimize user satisfaction.

SKILLS

- Java
- Spring Boot
- MySQL
- Java 8
- Spring Batch
- J2EE
- Hibernate/JPA
- HTML
- CSS
- React.js
- JavaScript
- GitHub
- Jenkins
- JIRA
- Visual Code
- IntelliJ
- Postman

EXPERIENCE

Senior Software Engineer / Wipro Limited - Bengaluru, India 04/2024 - Current

Project: HoneyComb CIF

Client - Apple Inc

HoneyComb CIF functions as a pivotal layer, receiving tax rate requests from end consumers (Apple Connect/IDMS)

- It communicates with Vertex to retrieve rates for specific TCC, Jurisdiction, and Question set, effectively managing the data within the CIF application based on the collection of questions
- Tools & Technologies: Visual Code, React.js, redux, Spring boot, microservices, Spring batch, oracle sql developer, JPA, Hibernate, Restful Api's, Open API 3

Decision and Fraud Management

Client : Visa inc.

Project Overview:

Led a fraud prevention initiative to manage and mitigate the risk of fraudulent login attempts through a dynamic decision and risk management system. Designed and implemented rules to lock and deny user accounts after a predefined number of failed login attempts, effectively reducing security breaches and unauthorized access attempts.

Key Responsibilities:

- Analyzed and identified patterns of fraudulent login attempts to design rules for user account lock and denial thresholds.
- Developed a dynamic decision-making framework to trigger actions (lock/deny) based on real-time risk assessments of failed login attempts.
- Created and implemented automated rules to lock user accounts after a specified number of failed login attempts, with customizable thresholds for different user segments.

- Executed regular performance evaluations for optimization of decision rules, effectively decreasing false positives and upholding high security standards.

Full Stack Developer / Cognizant India pvt ltd - Bangalore, IN

10/2021 - 03/2024

Project: HoneyComb CIF

Client - Apple Inc

HoneyComb CIF functions as a pivotal layer, receiving tax rate requests from end consumers (Apple Connect/IDMS)

- It communicates with Vertex to retrieve rates for specific TCC, Jurisdiction, and Question set, effectively managing the data within the CIF application based on the collection of questions
- Tools & Technologies: Visual Code, React.js, redux, Spring boot, microservices, Spring batch, oracle sql developer, JPA, Hibernate, Restful Api's, Open API 3

Project: OLSS

Online Self Service enables the order search functionality on the apple.com website, allowing users to effortlessly search and access their order details

- Tools & Technologies: RestAPI, Spring boot, Reactive Framework, JDBC, Hana DB, DevSec Pipelines, Jenkins

Software Developer / Bursys Infotech - Panchkula, IN

05/2018 - 09/2021

Project: FieldEquip

I spearheaded the FieldEquip project, overseeing work order management, Field Ticketing, IOT, and Service monitoring.

- Analysis design and coding
- Code review
- Production support and enhancements
- My contributions include empowering marketing with campaign creation, leading to increased customer traffic
- Additionally, I developed a feature for seamless record-keeping of multiple work orders and inventory
- Tools & Technologies: Visual Code, React.js, Spring boot, oracle sql developer, JPA, Hibernate, Restful Api's

EDUCATION

Bachelor of engineering: compute science & Engineering

08/2017

Doaba group of college - kharar, punjab

Diploma in Engineering: compute science & Engineering

08/2014

Doaba Polytechnic College - Nawanshahr

Matriculation

03/2011

DAV model senior secondary school - kurali, Punjab

AWARDS

FSE III Accreditation from Cognizant

LANGUAGES

- English
- Hindi
- Punjabi
